

Color My World More "Green"

If I were in charge of the world, I would do many things to change it. I'd like to go "Green" and save the environment!

I'd like the world to last forever! I'd like a clean world to live on. No more pollution! Plant more trees! Go "Green." You can help. Save water! Little things count as much as the big things.

Wouldn't you enjoy it if you were swimming in a clean ocean? Please stop polluting in the ocean. Don't throw soda cans or snack and candy wrappers in the water. Creatures under the sea will eat them and get very sick. Don't leave them on the sand, either because sea gulls and pelicans will eat them, too. Use garbage cans and recycling bins to throw out food wrappers and soda cans. Help!

Recycle. Instead of throwing old newspapers in garbage cans, put them in recycling bins. That saves paper, which will save trees. That will help the environment. Old cardboard and boxes can be recycled, too. Put them into your recycling bins. You may also throw soda cans and plastic containers in the recycling bin. Even if you think it won't make a difference because it is only one person – wrong! Each small thing makes an enormous difference. Recycle!

Please plant some native trees, shrubs, and other native plants. It all connects together. If you plant more trees than you are practically planting paper. Make the world "Green." Our world might not last forever but if I can help it, it will. Help! Grab your friends, some shovels and rakes and start planting!

Save water. You don't need the water running while you brush your teeth. You should take showers instead of baths. It saves water. You can even take shorter showers, even better! The world will thank you later.

Everything helps so please help other people and me save the environment by going "Green." Please don't pollute. Recycle! Grow plants. Save water. It will all connect together. Whatever you do will make a huge difference.

I hope all of you will help me by doing all these things. "Go Green." My world will be a lot more "Green."
