

Undergraduate Research Opportunities In Computational Atmospheric Physics

Undergraduate Research Opportunities are available in the field of Atmospheric Physics and Aeronomy. The research projects recently funded by National Science Foundation (NSF) in the RUI program aim to study the thermal and dynamical structure of the atmosphere in the region between 80 and 100 km. See www.lv.psu.edu/tuh4 for more information about my research. Hourly salary rates are competitive. Attending a one-week summer workshop (CEDAR workshop) sponsored by the NSF in a great location is possible and encouraged.

Requirements: Clear mind, quick learner, excellent math skills, interested in science, and good personality. Experience in writing computer code or using plotting software is a plus.

Positions are open until filled. Contact Dr. Tai-Yin Huang (tuh4@psu.edu) for further information as soon as possible.
